About this Report

The [National Association of Colleges and Employers](#) (NACE) and its member colleges annually undertake the First-Destination Survey initiative*, which provides the profession with graduate outcomes based on common standards and protocols.

The data gathered supports the individual needs of member schools and provides reliable outcomes information to their stakeholders and accrediting bodies, and enables the professional community to track trends and inform the public policy debate on the value of higher education.

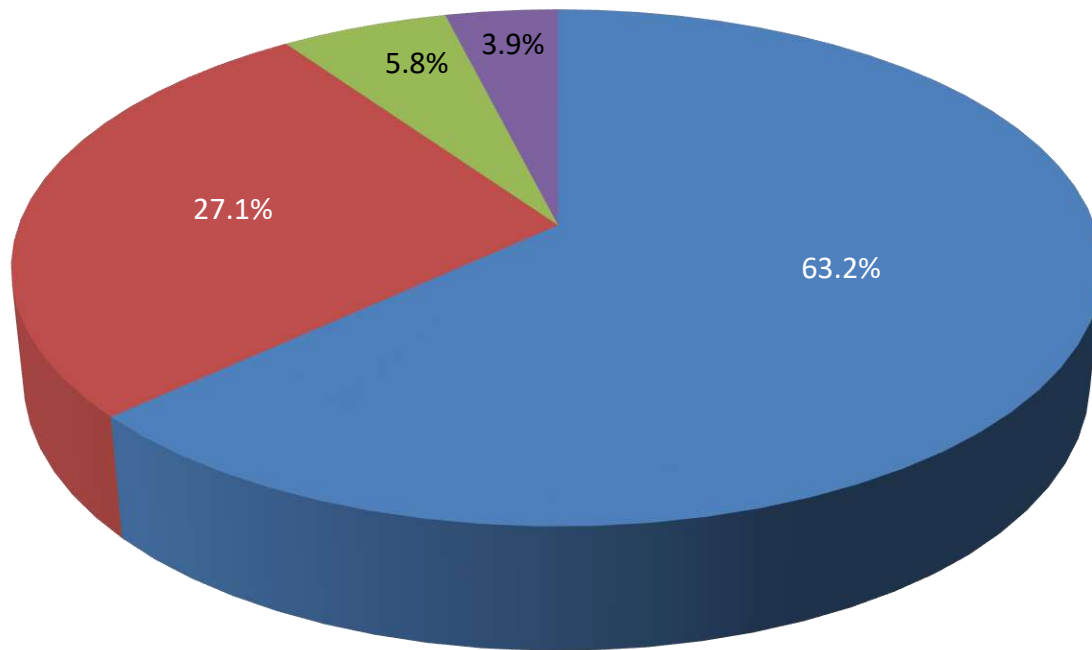

Data for this report was obtained through an on-line survey conducted October—December, 2017. Please note that all data is self reported by Crown College alumni who graduated between July 1, 2016—June 30, 2017. Graduates from both the School of Arts and Sciences (SAS/On-Campus) and School of Online Studies (SOS/Online), for both undergraduate and graduate degrees, were surveyed (279 total graduates and 133 respondents—a 48% response rate).

Please note: this report highlights employment data from Crown College alumni with undergraduate degrees. In the future a similar report may be done regarding alumni of Crown College’s online graduate programs.

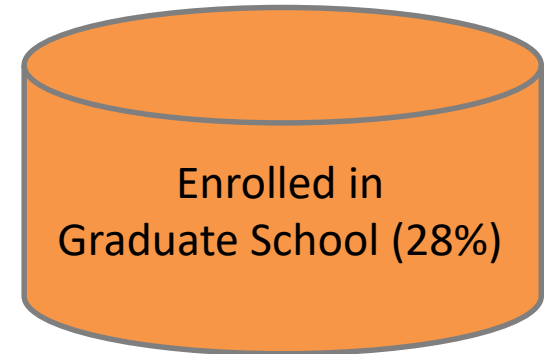

*[NACE 2016 Report](#)

Overview, Crown College Class of 2016-17

Undergraduate degrees*
91.2% are employed full-time
